

MEMORANDUM

TO: All Port Users
FROM: Tim Hungerford-Morgan
DATE: 4 April 2016
SUBJECT: WEOL project – sandblasting on wharf/neck

Please note that the Port of Broome is in the midst of a port refurbishment program stemming from the Wharf Extension of Life project.

You will note during your stay that the on-deck wharf and jetty works will impact traffic flow and management; therefore please factor this into your planning.

Beneath the wharf deck, important pile refurbishment is taking place to extend the life of the wharf and guarantee a future. This entails sand blasting and spray painting.

Please forewarn your passengers and crew that these works are taking place and there maybe periods of associated noise. All underdeck works are shrouded in protective shade cloth to prevent over spray. If detected, please have your crew report immediately to operations.

Yours faithfully

Tim Hungerford-Morgan
